To whom It May Concern

Our company BALTIC ENGINEERING in Gdansk has been cooperated with ULTIMA company from Sopot in wide range of vessels engine analysis. We have bought and installed the equipments serial EDI which helped us to solve many problems with monitoring and correction engines work. All systems are working properly and with no complaints whatsoever. During our cooperation ULTIMA Company presented its professional attitude towards our suggestions and questions regarding EDI system. We wish to confirm that ULTIMA Company received good references and their advanced technology products and services can be recommended for other customers in the market with no hesitation.
