### Usage

**EdiSoft** software is used for more advanced analysis of data obtained from devices **EDI-Panel** and **EDI-Portable**. Contains a set of tools that facilitate the interpretation of the characteristic of the engine cylinders. In addition, using **EdiSoft** is possible to configure **EDI** devices and change their firmware.

Is also possible to change the firmware of the modules included in the **EDI Multiplexer**.

The software is free of charge and available on our website.
