To: *Mr. Marek Glica*

Opinion

Dear Sir

As you request i send you our company opinion about monitoring systems.

I would like to inform that is already third year passed as we using your EDI system. We are very satisfied with this system especially when new software has given us opportunity to work without pickup installed on the fly wheel. All our ships are driven by meddle-speed engines so is not necessary to stop them for test. We keep the system on all our new ships and one system for rest of the ships. This movable system is used by 6 ships simultaneously and no complains from any Chief Engineers.

Port Engineer
